Claims 3, 19-26 and 30-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 15.

The disclosure is objected to because of the following informalities:

On page 3 of the instant amendment, applicants amend "the paragraph at page 48, line 21". Page 48 of the specification submitted for examination has only 9 lines and the instant amended paragraph appears to be the only paragraph appearing on page 48 with no changes. An explanation and/or correction is required.

Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2, 4-18, 27-29 and 34 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention and in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This is a combination written description and enablement rejection. This rejection is repeated for essentially the reasons

Art Unit: 1652

given in the last action. Applicant's arguments have been carefully considered but do not overcome the instant rejection.

The examiner has carefully considered the Remarks of the instant amendment and again reviewed pertinent parts of the specification. He has also considered Sirish, et al. (U), Kovacic, et al. (V) and Caravan, et al. (X) submitted with the amendment filed 12/29/03. After careful consideration he has concluded that the numbering system objected to on pages 50-51, e.g. "A<sub>43</sub> - R<sub>(19)</sub>" indicates that alanine at position 43 in the original engrailed was changed to arginine at position 19 in P3, etc. Applicants are requested to state if this is the correct interpretation. The examiner has also concluded, after considering the three reference mentioned *supra*, that the invention is enabled for metals of the lanthanide series, but not all metals. The examiner is considering rejoining claims 19-25, 30 and 31 as the nucleic acids encoding these chimeric peptides would not have been obvious if the peptides are not obvious. Table 1 shows that P3, P4a and P5L have activity as an artificial endonuclease and apparently P5L is a subgroup of P5 (page 51, lines 10-11). However it is not seen the claims 3, 32 and 33 have been shown to have activity and claim 26 is drawn to a method that has separate and distinct examination considerations from the other claims. Applicants' comments on the rejoinder of some of the instant claims but not others is requested. If applicants can show that claims 3, 32 and 33 define enabled embodiments then they should point out specifically where.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a

first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
